350 Km Range Surface-to-Surface Ballistic Missile "Dhanush" Successfully Launched

Dhanush, the India's 350 km range Surface-to-Surface ballistic missile was successfully launched today at 11:25 A.M from a naval ship off the coast of Balasore, Odisha. The missile was launched by India's strategic forces command. It was a text book launch meeting all the mission objectives. Dhanush, developed by DRDO, is India's short range (350 km range) strategic ballistic missile capable of being launched from naval ships.
